RENEWABLES WALES

We offer fully funded low carbon energy solutions for commercial businesses across Wales, including:

- Agriculture
- Rural businesses
- Tourism
- Engineering
- Food & drink
- Service industry

Secure, sustainable energy supply at below market price

Guaranteed minimum saving on your energy costs

Zero capital needed

How does it work?

01

The first step is to establish what energy you use on site alongside the potential for renewables through the completion of a simple questionnaire

02

Following this we will produce an estimate of how much renewable energy you could produce and what the potential savings are

03

Depending on the findings we will make a recommendation of which technologies would be the most suitable e.g. solar PV, wind turbines, CHP units and battery energy storage

04

We will also let you know if we don't think renewables are appropriate as we want to build long term and positive relationships with partners

05

If everything does look positive we will undertake all the relevant legal and regulatory works required to prepare a long term Power Purchase Agreement that sells all energy produced to your business at one consistent, low price

06

There is no requirement to pay the upfront capital cost of the installation but you do have the option to purchase the whole system in the future

07

Otherwise we will manage the system on your behalf for the lifetime of the project!

Banc

Development Bank of Wales was established by Welsh Government to support businesses in Wales with strong social, ethical and environmental standards. Our mission is to unlock potential in the Welsh economy and increase the provision of sustainable, effective finance.

infinite

Infinite Renewables is a specialist renewable energy developer based in South Wales. Established in 2011, the team have decades of professional experience in developing and installing low carbon, sustainable microgrids for surrounding business communities.

If you would like to find out how we can support your business to reduce energy costs and lower your carbon footprint please contact us for a free initial survey.
