Key Turbine Info

At Infinite Renewables we specialise in making sustainable energy production accessible to all, with tailor made solutions that meet your business needs.

Whatever your power needs, from smaller capacity BestWatt turbines to large multi megawatt machines, we have the expertise to procure the right turbine for you and deliver solutions anywhere in the world.

Existing customers can also benefit from **Repowering:** updating your outdated technology, to improve your investment.

Key BESS Info

Integrating Solar PV, wind turbines, and Battery Energy Storage Systems (BESS) is a hybrid system that maximises power production and stores it for when you need it.

Static Turbine Range

Sole distributor of BestWatt turbines in Wales and South West England

New and refurbished models are available from **EWT, BestWatt, Vensys and Enercon** with power output ranging from **15 kWh to 2 tWh**.
